Green Buildings Africa

Aurecon engineers design according to green building standards because it has become best practice within the sector. We have always promoted the importance of green building to our clients.

Aurecon's Environmental Sustainable Design team was established in 2011 and since then we have worked on various projects undertaken by developers who aspire, like ourselves, to transform the industry through innovative thinking and the desire to make a difference.

Each Green Star submission that Aurecon submits requires meticulous preparation of design documentation to be submitted to the GBCSA and external assessors for evaluation. Aurecon provides the full gamut of ESD and engineering services to maximise building performance and to enable clients to obtain Green Star certifications. Our position of leadership in the industry is maintained by having in-depth knowledge of what it takes to design a green building and to achieve certification.

We are continually learning and co-creating sustainable solutions for the greater benefit of all. All ESD team members are Green Star Accredited Professionals. Many of our staff are also pursuing niche degrees and diplomas in the field of sustainable design, engineering and real estate.

We are a founding member of the Green Buildings Council of South Africa, which is an independent entity, with its own processes for ensuring certifications meet global best practice.

About Aurecon

Aurecon is an engineering and infrastructure advisory company, but not as you know it. We've reimaged engineering.

Our clients' ideas and aspirations drive all that we do. We work alongside them like no other firm to co-create clever, innovative solutions to some of the world's most complex challenges, adding value across the project lifecycle through deep technical and advisory expertise. We serve our clients across a range of markets, in locations worldwide. Hardwired in our DNA are engineering, design and the deep need to leave a legacy. We are as diverse as we are dynamic. As curious as we are clever.

Drawing on our deep pool of knowledge, we bring vital engineering experience, technical capability and design expertise to the table. Then we listen deeply and intently. We see the opportunities, possibilities and potential that others don't. Through a range of unique creative processes and skills, we collaborate with our clients to re-imagine, shape and design a better future.

We believe humanity depends on engineering; and we recognise we have a broader stewardship role to play. A deep responsibility to hold. As we continually strive for a life in balance, Aurecon clients will be both future ready and engineered for life.

Think engineering. Think again.

Aurecon: Engineering, re-imagined.

To find out more about what we have been up to [visit our newsroom](#), or [take a glimpse into the future on our Just Imagine blog](#).

Privately owned by employees, Aurecon formed in 2009 when Africon, Connell Wagner and Ninham Shand [announced the formation of a new global group](#).
